will elect a majority of candidates for the logislature.

In the opinion of your correspondent the 30 days we would carry a McKinley. Our opponents underestimate our strength; and the McKinley that an are concerned. The only possible effect that the McKinley clicks not receive less than lased in the McKinley clicks not receive less than lased the strength of either the free silver Republicans or fuelonists—which, and a candidate for congress the strength of either the free silver Republicans or fuelonists—which, cannot be forefold. It may be that an equal number of votes will be drawn from either party, but it is more than likely that a majority of them will be drawn from the free silverites.

There is probably in reality no stronger McKinley sentiment prevailent today than there was six weeks ago, but the near approach of election has emboldened the McKinleyies, and they are no longer afraid to express their preferences.

THE POPULIST CHAIRMAN.

P. H. Blake, chairman of the Populist sinte central committee, endorsed the statements of McGee and declared. I sendhatic terms that Gunn will bury Borah so desp-metaphorically speaking—that the latter will nover again be heard from. He also said that in his opinion Senator Dubois will not have twenty-five votes in the legislature—tregulers thirty-six to elect. When questioned as to who would probably he the heat senator from Idaho, in the event of Populist success, he declined to answer He lauphlingly said, however, that there will be enough candidates to select from.

Mr. Blake admits that he is handis

years that the voters are thoroughly familiar with it and do not need further education in that direction.

In cettinating the strength of the Populate is must be borne in mind that the Populate party in Idahe was, to a great extent, the result of dissatisfaction sithin the Republican ranks, and therefore a majority of the Populates, and therefore a majority of the Populates. There is a silver Republican ticket in the field, and whether or not the extensions of the G.O. P. will forsalie the first be to assert are we Republicans. There is a silver Republican ticket in the field, and whether or not the extensions of the G.O. P. will forsalie the first love is a question that can be settled at the polis only. If they should return then the estimate of Messrs. McGee and Blake of 15,000 votes for Gunn is about 18,000 too many.

The Populatist claim that there are no disgruntled members of their party, and that instead of losing they are raining to strength every day.

In entirely and the the resister Republicans and McKhilegites, James H. Hawley, a leading Democrat, who is now stumping the state in the interests of florah and Dubois, asserts that the Populatist vate will fall short of that of two years ago. He bases his assertion input the supposition that lansmuch as tree silver is the cardinal principle of the Populatist in Idahe, they will naturally instate before voting for members of the legislature opposed to Dubois, despite his hitherto Republican procilytics—which, by the way, he still address to, with the exception of advocating free coinage. which by the way, he still to, with the exception of ad-free coinage.

Mr. Harma and his associates in the national campaign considered the scheme of the Illinois committee and received protests against any action which could be tande use of to create a clash entween the political forces, or to base a charge that Mr. Bryan's campaign tour was being interfered with. Executive Committeeman Cyrus Leiand, ir, returned to headquartiers tosiay, after a long stay in his western territory. He spent host of the time in Kansas, and gave some attention to Nebrasika. It may be interesting to your readers to know that there are more political meetings held in this city on Sunday than any other day in the week. I suppose, it the truth were known, there were 700 or 800 held here yesterday. I was assigned to speak at three, It struck me a little strange at first thought, and I interposed a mild demurrer. Upon inquiry, however, I learned that there are great numbers of working people and business men who cannot find the time to attend such meetings on any other day. I was reminded also, that our cause is one designed, to relieve suffering humanity, and that the contest is one for financial emancipation, so I waived the demurrer which I had interposed. Sam Small, well known in Utah, and, especially at Ogden, was on the stump in the city yesterday. There were many other preachers of less notoriety who were likewise taking a hand in the political arena.

In opposition to any such policy as that proposed by the Chicago and Populist conventions he urged that by holding fast to the best money the people would always have the best things that money could buy.

Turning to other parts of the platform, Mr. Carlisle said if the free and unlimited coinage of silver at the ratio of 16 to 1 were the only issue presented, every old line Democrat in the country would be fully justified in refusing to support the nominee of the Chicago and St. Louis Populist convention; but it was not the only issue, and it might in the end prove to be not even the most important one.
